DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Claim Objections

2. Claims 7, 8 are objected to because of the following informalities: Claim 7, line 9 recites: "said output clock", this should be "said output **signal**" since an output signal was mentioned in lines 5 and 7 of claim 7.

Claim 8, line 2 recite: "...a filter for of significantly..." the "of" should be removed. The rest of the dependent claims are objected too since they carry the limitations of objected claim 7.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

The prior art of the record fails to teach or suggest alone or in combination:

A digital spread spectrum frequency synthesizer, comprising:

means for adjusting said period control word by a period offset in response to said output clock; as recited in independent claim 1 and in combination with other elements of the claim.

Claims 1-6 are allowed.

4. The prior art of the record fails to teach or suggest alone or in combination:

Art Unit: 2611

A digital spread spectrum frequency synthesizer, comprising: a divider for generating an output signal by means of dividing a reference signal by said time-varying value, said output signal feeding back to said noise-shaped quantizer so that said noise-shaped quantizer generates said time-varying value in response to said feedback output signal; and means for adjusting said period control word by a period offset in response to said output clock, as recited in independent claim 7 and in combination with other elements of the claim.

Claims 7-15 would be allowable if they are amended to overcome the claim objections mentioned above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 2611

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Huff et. al., (U.S. 6,961,400) disclose: a frequency synthesizer using a delta-sigma modulator with a corrected frequency (period) control word.

Miyabe (U.S. 6,559,698) discloses: a spread spectrum clock generator using a sigma delta modulator with a gain offset .
